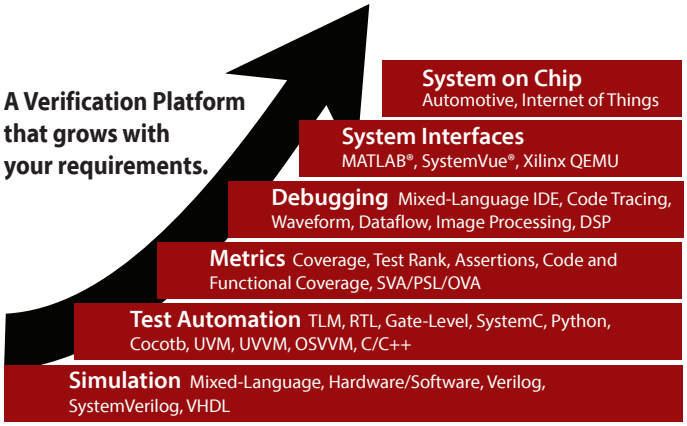
Riviera-PRO™ | Advanced Verification

Verification Platform

Riviera-PRO™ addresses verification needs of engineers crafting tomorrow's cutting-edge FPGA and SoC devices. Riviera-PRO enables the ultimate testbench productivity, reusability, and automation by combining the high-performance simulation engine, advanced debugging capabilities at different levels of abstraction, and support for the latest Language and Verification Library Standards.



Top Benefits

- **Standards-based support for VHDL, SystemVerilog, and SystemC to enable design and verification of the most sophisticated digital designs**
- **High-performance simulator with industry-leading capacity and high regression throughput for developing complex systems**
- **Integrated multi-language debug environment to automate time-consuming design analysis tasks and fix bugs quickly**
- **Comprehensive assertion-based verification (SVA, PSL) for increased design observability and decreased debug time**
- **Advanced code coverage capabilities and coverage analysis tools for fast metric-based verification closure**
- **Supports methodologies like UVM, OS-VVM and UVVM for advanced verification strategies.**

High Performance Simulation

Riviera-PRO incorporates industry-leading simulation optimization algorithms to achieve the highest performance in mixed-language simulations. Combined with the industry-leading capacity, Riviera-PRO enables high regression throughput for developing the most complex systems.

Advanced Debugging

Integrated multi-language debug environment enables automating time-consuming design analysis tasks and fixing bugs quickly. It supports all standard languages and provides intuitive ways to visualize and analyze key objects in your design. Built-in debugging tools provide code tracing, waveform, dataflow, coverage, assertion, UVM, and memory visualization capabilities.

Industry's Best ROI

Riviera-PRO enables Aldec customers to deliver innovative products at a lower cost in shorter time. Aldec's proven design automation methods help customers to speed up the design and implementation of products for automotive, medical, aerospace, and military applications. In addition to EDA tool packages accompanied by the comprehensive trainings and support, Aldec invests in the partnerships and integrations necessary to build complete design and verification flows.
